RE: Quarterly Performance Summary for Q1 of Calendar Year 2024

#### Summary:

The following quarterly reports demonstrate the performance of the bargaining and non-bargaining pension plans for the first quarter of calendar year 2024. The report shows market value, asset allocation percentage and performance compared to benchmarks. The bargaining and non-bargaining pension assets were up 4.15% and 4.14% for the first quarter of calendar year 2024, respectively. Pension plans are measured on long-term performance and it is expected that short-term fluctuations in market performance will exceed or fall short of long-term plan assumptions. The recommended actuarial employer contributions account for the disparity between assumptions.

\*[Current Estimate] At any point in time the valuation for private equity and other illiquid asset classes may be different from market prices due to an inherent lag effect in the industry. The reporting lag inherent in this process means that there can be a valuation lag of a quarter or, in some cases, even longer. For such illiquid asset classes shown herein, performance is calculated for the relevant period(s) using a roll-forward valuation approach whereby the last reported valuation is adjusted for cash flows to provide an initial estimated valuation, typically resulting in a zero return for the lagging period. Performance is adjusted and finalized when the updated valuation is reported. Returns are gross of management fees. The roll-forward valuation methodology described is consistent with guidance provided within the CFA Institute's Global Investment Performance Standards (GIPS). Performance is calculated using the Modified-Dietz time weighted methodology to maintain consistency with the other returns in this exhibit. For since inception IRR performance, please refer to the fund-specific overview page.

Returns are net of mutual fund fees.

Returns are expressed as percentages.

<sup>\*</sup>Asset class level returns may vary from individual underlying manager returns due to cash flows.

\*[Current Estimate] At any point in time the valuation for private equity and other illiquid asset classes may be different from market prices due to an inherent lag effect in the industry. The reporting lag inherent in this process means that there can be a valuation lag of a quarter or, in some cases, even longer. For such illiquid asset classes shown herein, performance is calculated for the relevant period(s) using a roll-forward valuation approach whereby the last reported valuation is adjusted for cash flows to provide an initial estimated valuation, typically resulting in a zero return for the lagging period. Performance is adjusted and finalized when the updated valuation is reported. Returns are gross of management fees. The roll-forward valuation methodology described is consistent with guidance provided within the CFA Institute's Global Investment Performance Standards (GIPS). Performance is calculated using the Modified-Dietz time weighted methodology to maintain consistency with the other returns in this exhibit. For since inception IRR performance, please refer to the fund-specific overview page.

Returns are net of mutual fund fees.

Returns are expressed as percentages.

<sup>\*</sup>Asset class level returns may vary from individual underlying manager returns due to cash flows.

RE: Adoption of the Fiscal Year 2025 Operating and Capital Budget

### Recommendation

Recommend that the Board of Directors adopt the proposed fiscal year 2025 (FY25) operating and capital budgets.

### **Background**

SunLine's Budget Policy No. B-020704 requires that the budget be submitted to the Finance/Audit Committee for discussion. Upon the recommendation of the Finance/Audit Committee, the budget is then presented to the Board of Directors for approval and adoption. A draft budget was presented to the Finance/Audit Committee and Board of Directors on May 22, 2024. During the May meeting, staff answered questions and provided the opportunity for additional special meetings.

There have been no substantive changes to the proposed draft budget presented at the May meeting. The proposed operating and capital budgets for FY25 are \$49,417,378 and \$21,826,973, respectively. The proposed operating budget for FY25 represents a 4.1% increase over the FY24 budget. Staff believes that this budget reflects a fiscally responsible approach to ensuring the agency satisfies its operating and capital needs.

### Financial Impact

Multiple sources of revenues and subsidies have been identified to cover the expenses reflected in this year's operating and capital budgets.

### **SERVICE & RIDERSHIP**

SunLine has experienced a continual increase in ridership for FY24. SunLine anticipates that ridership will continue to grow. Ridership has experienced slow growth nationwide, however, SunLine appears to have recovered ridership quicker than some of its peers.

The Agency's newest service, SunRide, has been a contributor to the overall increase in ridership. In FY24, SunLine introduced new microtransit zones and monitored existing SunRide resources to ensure they were efficient and effective.

### **REVENUES & SUBSIDIES**

SunLine is required to meet a performance standard known as a farebox recovery ratio in order to avoid funding issues with state funding. Although farebox revenue has decreased compared to revenues prior to COVID-19, SunLine's budget is still compliant with the farebox requirement outlined in the Transportation Development Act.

The proposed revenues for FY25 consist of a mix of passenger fares, federal, state, local funding, and other revenues with the main assumptions being as follows:

- The utilization of Local Transportation Funding (LTF) has an increased for FY25 due to an overall increase in available LTF funding throughout the state which is driven by sales taxes.
- Following a significant downturn in ridership in March 2020 related to the COVID-19 pandemic, SunLine has experienced an increase in passenger revenue which aligns with projected ridership increases.
- In August 2018, SunLine launched its Haul Pass Program to improve student access to Coachella Valley's colleges and university. Both the College of the Desert (COD) and the California State University, San Bernardino (CSUSB) Palm Desert Campus are partners. COD and CSUSB underwrite the cost of the passes for their students. In FY22, Sunline expanded the program to include high school students. The Haul Pass program for high school students is funded through a grant from the Low Carbon Transit Operations Program (LCTOP).

### **CAPITAL PROJECTS**

The capital budget incorporates key projects to help further advance the Agency's Capital Improvement Program (CIP). The CIP for FY25 focuses on riders, replacing employee equipment and facilities and continuing SunLine's investment in alternative fuel technology for vehicles and infrastructure.

### **New Projects**

There are 14 capital projects being requested in FY25 for a total amount of \$21.8M which include new projects and additional funding for existing projects. These projects represent an emphasis on innovation while aligning with the Agency's Board approved Innovative Clean Transit (ICT) plan. The requests in FY25 will be in addition to the existing CIP. These projects cover the replacement of aging facilities and equipment. They support replacement and rehabilitation of existing assets as well as continue the advancement of alternative fuel technology. The most notable new projects for FY25 include studies, planning and engineering required to properly replace the Agency's aging facilities and equipment.

• The FY24 variance reflects the difference between FY24 estimates and FY24 approved budget. The FY25 variance indicates the difference between FY25 proposed budget and FY24 approved budget.

In addition to passenger and other revenues, the Agency receives a mix of funding from federal, state, and local funding sources. These are utilized to fund the operation of nine (9) routes, connecting the Coachella Valley from Desert Hot Springs and Palm Springs in the northwest to Mecca, Oasis, and North Shore in the east, one (1) express line on hwy 111 and one (1) regional Commuter route operating between Indio and San Bernardino. The Agency's service includes complementary paratransit service to locations within 3/4 miles of the local fixed route network. An overview of each funding source is outlined below.

# CARES ACT & ARPA FTA SECTION 5311 & 5311(f)

The CARES Act & ARPA funding includes provisions for new transit funding to assist transit providers during the COVID-19 pandemic. Eligible expenses include Projects for preventing, preparing for, and responding to the COVID-19 disease such as: operating costs to maintain service, lost revenue due to COVID-19 public health emergency, purchase of personal protective equipment associated with response to the pandemic, administrative leave salaries for operations personnel.

### **HAUL PASS**

In August 2018, SunLine launched its Haul Pass Program to improve student access to Coachella Valley's colleges and university. Both the College of the Desert (COD) and the California State University, San Bernardino (CSUSB) Palm Desert Campus are partners. COD and CSUSB underwrite the cost of the passes for their students. In FY22 SunLine expanded the program to include high school students. The Haul Pass program for high school students is funded through a grant from the Low Carbon Transit Operations Program (LCTOP).

# **CONGESTION MITIGATION & AIR QUALITY (CMAQ)**

CMAQ funds are used to support the SunRide and the proposed Route 1X.

# **EMISSIONS CREDITS (SALES OF FUEL CREDITS)**

Included within AB 32 is the Low Carbon Fuel Standards (LCFS) program which regulates the carbon content of transportation fuels through the designation of regulated parties for various types of fuels. CNG is considered a low carbon fuel and is exempt from all LCFS regulation unless the Regulated Party wishes to earn and trade their LCFS credits. Under California Air Resources Board (CARB) regulations, the Agency, as the owner of the CNG fueling stations, can earn LCFS credits for CNG Therm usage. Those credits may then be sold to other entities that have difficulty attaining the legislated standards for their carbon cap limits. These entities will be able to purchase carbon credits to offset their carbon deficits.

# **FAREBOX**

Farebox revenues are generated from the collection of passenger fares and ticket sales. This revenue is projected based on historical data and planned service levels.

# **FTA SECTION 5307**

Section 5307 is a Federal Urbanized Area Formula Fund authorized under MAP 21 legislation which apportions federal funding on factors such as urbanized area population and ridership.

# CALIFORNIA ENERGY COMMISSION AND CALIFORNIA AIR RESOURCES BOARD

The California Energy Commission (CEC) and California Air Resources Board (CARB) are two State agencies that focus on reducing green house gas emissions. Funding for FY24 will be utilized for training and curriculum for the Center of Excellence.

# **REVENUE & FUNDING SOURCES**

# FTA SECTION 5311/5311(f)

Section 5311 is a Federal Rural Area Formula Fund authorized under MAP 21 legislation which apportions federal funding in support of transportation services in rural areas (< 50,000 population). Section 5311(f) is funding allocated for intercity bus operations.

### **CLEAN CITIES**

In 2021, SunLine became a member of the Clean Cities Program. Under this Program, SunLine was designated as Clean Cities Coordinator for the Coachella Valley. The Program was formed in 1993 by the U.S. Department of Energy in coordation with the Environmental Protection Agency. SunLine has leveraged its designation as Coordinator to receive funding to support various data tracking and reporting activities related to our existing use, and production of alternative fuels.

# LOCAL TRANSPORTATION FUND (LTF)

This funding is derived from a 1/4 cent of the general sales tax collected statewide.

# LOW-CARBON TRANSIT OPERATIONS PROGRAM (LCTOP)

LCTOP funding was created from the Transit, Affordable Housing, and Sustainable Communities Program in 2014. The program provides operating and capital assistance for transit agencies to reduce greenhouse gas emissions and improve mobility with a priority on disadvantaged communities.

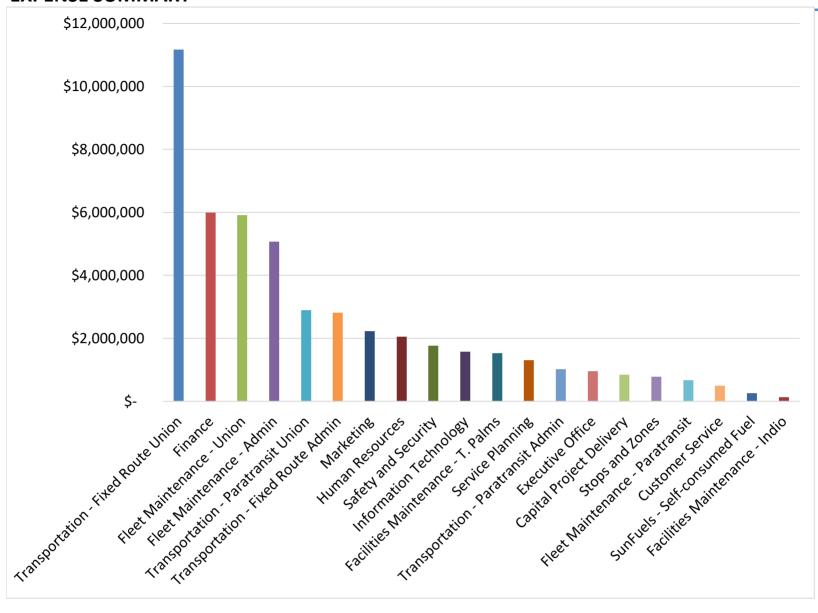

# **MEASURE A**

Measure A is local funding for specialized transportation projects approved by voters in 1988. This funding is a half-cent sales tax for Riverside County and was re-approved by voters in 2002. This funding will continue until 2039.

# **TAXI VOUCHER PROGRAM (Passenger Sales)**

This revenue is generated from customers purchasing taxi vouchers from SunLine as part of our Taxi Voucher Program. The customer receives a match from SunLine for the amount paid (\$1 for \$1). Customers are limited to a programmed limit per month and can reload their cards during a specific time frame.

# TRANSPORTATION OFFICE

#### **TRANSPORTATION OFFICE**

Division 11, 12, 13 (Ops Only Portion), 14

#### **FUNCTIONS & RESPONSIBILITIES**

The Transportation Office plays a pivotal role in managing the daily transit services crucial for addressing the evolving mobility demands of the Coachella Valley. This encompasses overseeing the SunBus Fixed Route and SunDial Paratransit services. The SunLine's fixed route network is extensive, encompassing nine local routes spanning the Coachella Valley. Moreover, SunLine offers commuter express services that extend beyond its service area, facilitating connections between the Coachella Valley and San Bernardino. This connection facilitates seamless transitions to Metrolink trains and routes served by various regional transit agencies such as the Riverside Transit Agency, Omnitrans, Victor Valley Transit Authority, and Mountain Transit.

For individuals with disabilities who are unable to utilize the fixed-route transit system, ADA Paratransit services offer essential accessibility. Paratransit Reservationists play a vital role in this process, assisting in scheduling rides, catering to special requirements such as mobility devices, accompanying clients, and ensuring the accommodation of service animals.

Furthermore, the Transportation Projects team extends its support beyond routine operations by engaging in transportation and maintenance projects that fall outside the realm of large-scale capital construction. This multifaceted approach underscores the commitment to ensuring comprehensive and efficient transportation services while accommodating diverse needs within the community.

### **SunLine Transit Agency**

DATE: June 26, 2024 ACTION

TO: Strategic Planning & Operational Committee

**Board of Directors** 

FROM: Paul Mattern, Chief Planning Officer

RE: Adoption of Fiscal Year 2025-27 Short Range Transit Plan (SRTP)

### Recommendation

Recommend that the Board of Directors adopt the FY25-27 Short Range Transit Plan (SRTP).

### **Background**

The SRTP, updated annually, describes SunLine's operating and capital plans and funding sources. The SRTP is prepared according to the Riverside County Transportation Commission (RCTC) requirements and guidelines, the California Public Utilities Code, and California Transportation Development Act. The attached FY25-27 SRTP focuses on a number of projects that are close to completion and the improvements and reliability of the whole transit system.

Within this context, the SRTP prioritizes the following goals:

- 1) Maintain our current route reliability and gradually improve frequencies as key performance data deems it necessary;
- 2) Deploy SunRide with a focus on filling transit gaps and feeding the fixed route system;
- 3) Complete construction of the Coachella Mobility hub before September 2024 service change implementation;
- 4) Complete the radio and CAD/AVL replacement project;
- 5) Update bus stop signs and schedule holders and install new bus shelters across the service area according to policy to enhance customer service, optimize trip planning technologies, and improve communication with passengers;
- 6) Improve service reliability with the completion of the liquid hydrogen station;
- 7) Construct a second liquid hydrogen station in Indio for additional fuel dispensing capacity;
- 8) Conduct a study on SunLine's fare structure to understand rider preferences and agency needs; and
- 9) Continue to implement the Innovative Clean Transit (ICT) plan and transition to zero emissions by 2035 five (5) years ahead of the deadline set in the ICT Regulation.

The service and capital plans recommended in the SRTP are within the confines of the FY25 budget, which will be presented to the Board of Directors for consideration as a separate item.

RCTC staff reviewed the first draft of SRTP in April and recommend this plan be considered a three (3) year plan, FY 2025-27, due to the budgeting forecast of three years. At the May Board meeting, staff presented a draft of the SRTP. Staff now recommends adoption of the final FY25-29 SRTP.

### **Financial Impact**

The operating and capital costs have been budgeted for in the FY25 budget.

### **BOARD OF DIRECTORS**

SunLine was established under a Joint Powers Authority (JPA) on July 1, 1977, between Riverside County and the communities of the Coachella Valley, which at the time included the Cities of Coachella, Desert Hot Springs, Indio, Palm Desert, and Palm Springs. The JPA was later amended to include the Cities of Cathedral City, Indian Wells, La Quinta, and Rancho Mirage. The JPA's governing board consists of one elected official from each member entity and one county supervisor. The Board of Directors are responsible for setting Agency policy.

# **Chapter 1. System Overview and Service Profile**

As the Agency stands at the threshold of a new era, it is crucial to reflect on the challenges that have shaped our journey thus far. The convergence of the COVID-19 pandemic, a national shortage of labor, and the failure of critical infrastructure such as the hydrogen-fueling station has undoubtedly tested the resilience of our transit system. The cumulative impact of these adversities has led to disruptions, unreliable service, and, regrettably, necessary service cuts. It has underscored the urgent need for adaptation and innovation.

Despite these obstacles, we are poised to embark on a fresh path forward. Our foremost priority is clear: the customer. As we enter this new chapter of the Agency, we do so with a sense of determination and purpose. We recognize that the heart of any successful transit system lies in its ability to meet the diverse needs and expectations of its ridership. With this guiding principle at the forefront, we are dedicated to ensuring that every decision, every initiative, and every investment is driven by a genuine focus on enhancing the passenger experience.

Our vision for the future is one of reliability, accessibility, and excellence. We are committed to leveraging innovative technologies, optimizing operational efficiencies, and fostering collaborative partnerships to deliver a transit system that our passengers can rely on, day in and day out.

While we acknowledge the challenges we have faced, we also want to take the time to celebrate the achievements that help define our Agency's legacy:

- We proudly highlight a key aspect of our service that sets us apart our commitment to providing the lowest fares in the region. Our Board of Directors and staff understand the importance of accessible transportation options for all community members, regardless of their socio-economic status. By keeping our fixed route fare at \$1, we ensure that our services remain accessible to everyone, fostering inclusivity and connectivity across our community. Our goal is that maintaining low fares will enhance the attractiveness of public transit as a viable transportation option.
- Over time, the transit industry has learned that the traditional fixed-route system may not always serve every corner of our community effectively. We are proud that our microtransit service, **SunRide**, has been able to expand into more cities bringing flexible, on-demand transportation to areas that were previously underserved by traditional transit routes.
- In recent years, SunLine has been honored with three large awards (Figure 1-1) within the transit industry. These accolades serve as a testament to the hard work and dedication of all our employees and inspires us to chart a course for the future that refocuses our efforts on the customer experience.

For years, SunLine has been at the forefront of the clean fuels revolution, spearheading initiatives to reduce emissions and mitigate environmental impact. Our investment in hydrogen fuel cell technology, in particular, has positioned us as a trailblazer in the transition to cleaner,

greener transportation solutions. While the challenges of the last year related to our hydrogen station were undoubtedly disappointing, they also serve as valuable lessons in resilience and adaptability. We are committed to learning from the past, and leveraging our experiences to inform smarter, more resilient strategies for the future to ensure we stay on target for our Innovative Clean Transit roll-out plan goals.

As we look to the future outlined in this FY 2025-2027 Short Range Transit Plan (SRTP), we are approaching the upcoming years with optimism. We will navigate the road ahead alongside our community and are confident that the best is yet to come for SunLine Transit Agency.

### 1.2 Population Profile and Demographics

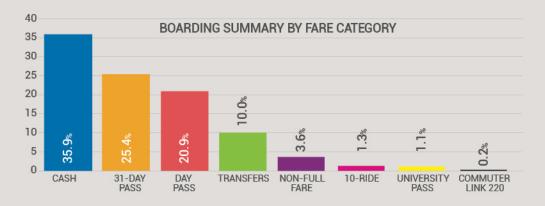

The 2019 SunLine Transit Rider Survey was an important source of information for the plan. It gave SunLine staff a pre-COVID-19 ridership profile and described how riders used the transit system. The infographic on the next page shows the demographic characteristics of SunLine's riders before the pandemic. SunLine is preparing a new rider survey to assess changes resulting from the pandemic and the changes made to the system in the years following.

### 1.2.1 Demographic Projections

Despite ridership downturn related to the COVID-19 pandemic, population growth in Riverside County and the Coachella Valley will continue to drive demand for public transit services. In considering the public transit needs of the Coachella Valley, it is essential to understand the diverse demographics that make up our community. The Coachella Valley is characterized by a unique blend of residents, ranging from retirees to young families seeking opportunities for growth and prosperity. Additionally, our region experiences seasonal fluctuations in population due to tourism and seasonal residents, particularly during the winter months. Furthermore, we recognize the presence of economically disadvantaged populations, seniors, individuals with disabilities, and other vulnerable groups who rely heavily on public transportation for their mobility needs.

Like other transit agencies nationwide, SunLine is faced with the challenge of maintaining core service, extending service to new developments, and addressing the financial challenges resulting from the COVID-19 pandemic. It is imperative that we take into account these demographic nuances and strive to design services that are inclusive, accessible, and responsive to the diverse needs of our community. With the massive amount of growth we are experiencing in the Coachella Valley and limited funding, SunLine would be unable to provide direct service from every trip origin to every destination. However, with careful planning, we are working to ensure that our transit system effectively serves as a lifeline, connecting people to essential services, employment opportunities, recreational amenities, and each other.

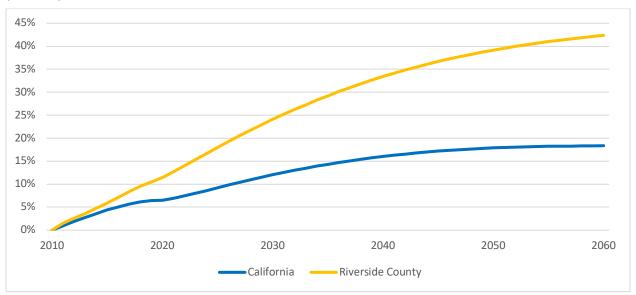

The California Department of Finance estimates that the nine cities of the Coachella Valley had a population of just over 390,600 in January 2021. Riverside County has been growing faster than the state's population, and the Department of Finance projects this will continue through 2060, as shown in Figure 1-4. Within Riverside County, the Southern California Association of Governments (SCAG) projects that the nine cities of the Coachella Valley will grow faster than the county between 2016 and 2045.

Projections prepared by SCAG show that the Riverside County population is expected to grow by 37.6 percent from 2016 to 2045. This means an increase from 2.36 million people in 2016 to 3.25 million people in 2045, as shown in Figure 1-5. In contrast, the population in Coachella Valley cities is projected to grow even faster, increasing 55 percent over the same 29-year period, from 450,130 in 2016 to 697,690 in 2045, as shown in Figure 1-6. Growth percentages within the Coachella Valley vary by city. Coachella and Desert Hot Springs are among the cities projected to grow the fastest within the SCAG region, ranking first and third, respectively, among all SCAG cities by percentage growth over the next three decades.

Disadvantaged communities in California are specifically targeted for investment of proceeds from the state's cap-and-trade program. Senate Bill 535 mandates that 25 percent of the proceeds from the Greenhouse Gas Reduction Fund go to projects that benefit disadvantaged communities. These investments are primarily aimed at improving public health, quality of life, and economic opportunity in the state's most burdened communities while also reducing pollution.

Disadvantaged communities are defined as the top 25 percent scoring census tracts from the California Environmental Health Screening Tool (CalEnviroScreen). The Senate Bill 535 disadvantaged communities within the SunLine service area are illustrated in Figure 1-7.

Figure 1-7 Senate Bill 535 Disadvantaged Communities

Several federal funding programs specifically target investment toward areas designated as Areas of Persistent Poverty or Historically Disadvantaged Communities. Areas of Persistent Poverty include census tracts with poverty rates of 20 percent or higher based on the 2014 to 2018 5-year American Community Survey, counties that have had poverty rates of 20 percent or higher in the 1900 and 2000 Decennial Censuses and the 2020 Small Area Income Poverty Estimates, and territories or possessions of the United States. Historically Disadvantaged Communities include census tracts identified based on six factors of socioeconomic disadvantage, tribal lands, and territories or possessions of the United States. Areas with these designations within the SunLine service area are shown in Figure 1-8.

### 1.3 Description of Services

SunLine's existing transit service includes SunBus (local bus), Commuter Link (regional commuter), SunRide (microtransit), and SunDial (paratransit). Additionally, SunLine's taxi voucher program provides additional transportation options to residents throughout the Coachella Valley. Each of these service types is described briefly in the following sections.

### 1.3.1 SunBus – Local Bus

SunLine currently operates nine local routes in its service area. The local bus network is broken down into trunk routes and connector or feeder routes. Trunk routes serve highly traveled corridors with more frequent headways and include Routes 1EV, 1WV, and 2. Connector/feeder routes operate in less dense areas and connect to trunk routes. These routes generally operate at less frequent headways and include Routes 3 through 9. SRTP Table 1.0 (see the Tables section of the SRTP) shows a list of the routes and the areas they serve. Figure 1-9 illustrates fixed-route ridership trends over the last few years, including the impact of the COVID-19

pandemic service reductions and the subsequent recovery. Figure 1-10 shows the SunLine system map. Appendix A shows existing route profiles.

### 1.3.2 Commuter Link – Regional Commuter

The Route 10 Commuter Link, in operation since July 2021, is designed to improve regional service between the Coachella Valley and the Inland Empire. For students, the 10 Commuter Link provides a direct connection between CSUSB's campuses in Palm Desert and San Bernardino. It also provides service to the San Bernardino Transit Center (SBTC) for connections with Metrolink trains and routes served by the Riverside Transit Agency, Omnitrans, Victor Valley Transit Authority, and Mountain Transit.

#### 1.3.3 SunRide – Microtransit

Microtransit is an emerging transit mode that offers flexible and dynamic demand-driven transportation solutions to areas with limited transit access or where traditional fixed route service is simply not feasible. Microtransit is a shared-ride service that typically operates a fleet of smaller vehicles (for example, cutaway buses or vans—see Figure 1-11) in defined zones, with dynamic routing based on real-time demand. Similar to companies such as Uber and Lyft, users in designated areas specify the details of their trips on a mobile application and a vehicle is dispatched to deliver them to their destinations. Operating specifics such as service hours and coverage are tailored to meet the needs and/or resources of the agency (fleet availability, operating budget, etc.).

16

### **SunRide Operations**

The microtransit service, known as SunRide, serves eight zones in the Coachella Valley—Cathedral City, Coachella, Desert Hot Springs (including the community of Desert Edge), Indio, La Quinta, Mecca-North Shore, Palm Desert, and Palm Springs (Figure 1-12 to Figure 1-19). This on-demand service bridges the gap between riders and the fixed route network or designated points of interest. Riders typically use the SunRide smartphone app to book their ride, which dispatches a SunRide vehicle to pick them up and drop them off at locations indicated within the designated geo-fenced zones. Riders without access to a smartphone may also book a trip by calling SunRide's Customer Service number or through the SunRide web portal at: <a href="mailto:book.sunride.rideco.com">book.sunride.rideco.com</a>. The service is available Monday through Friday between 5:30 a.m. and 6:30 p.m.

The SunRide fare is \$3 per person, which includes a free transfer to/from the intersecting fixed bus routes. SunRide's on-demand service allows a rider to book a trip within 15 minutes or to schedule a trip up to 7 days in advance. Riders may opt for contactless payment by choosing to pay using their credit or debit card. The app allows riders to store their credit or debit card information within the app for convenience when booking future rides. Riders may also choose to pay for their ride in cash by paying the SunRide driver directly when SunRide is the first leg of the trip or by purchasing a \$3 "SunRide Transfer Pass" on the fixed route bus when the rider boards the bus as the first leg of the trip.

#### SunRide Technology Platform

In January 2022, SunRide introduced a new SunRide branded mobile application (Figure 1-developed by RideCo that offers additional features and functionality to enhance the user experience. Some of the new features and functionality include improved connections to the fixed route network, projected trip arrival times, and a five-star rider rating system. Putting ourselves in the shoes of our riders, SunLine has also added new stops at common points of interest within each geo-fence zone that serve as ride generators, providing new touchpoints for a choice rider experience. These points of interest include stops within a short walking distance of education, shopping, and medical facilities, implementing further service flexibility and more mobility options that are inclusive of a larger demographic. An advanced back-end software platform features a robust reporting suite to assist in evaluating the program's performance metrics.

Figure 1-20 SunRide Mobile App

#### 1.3.4 SunDial – Paratransit

SunLine operates SunDial ADA paratransit to provide service to those certified under the ADA who cannot ride fixed route bus service. SunDial operates within three-quarters of a mile on either side of the SunBus route network and is available by advanced reservation only. Reservations may be made based on the service hours of the fixed routes serving passengers' origins and destinations and may be used only at the same times, days, and frequency as local fixed route service. SunDial service is an origin-to-destination, shared-ride transit service for

persons who are functionally unable to use the fully accessible fixed route service either permanently or under certain conditions. Eligibility is not solely based on having a disability.

SunDial service is provided with a fleet of 39 vans 7 days a week during the same hours and days as the fixed route network. Service is not provided on Thanksgiving nor Christmas Day. As an operator of bus service, SunLine is required under the ADA to ensure that paratransit service is provided to eligible individuals with disabilities. The level of service provided must be comparable, in terms of hours and days of service and area served, to the service provided by the fixed route bus system.

To be eligible, all persons must complete an application, describing in detail the nature of their mental or physical disability that may prevent the individual from using regular fixed route service. Applicants must obtain an approved health care professional's statement and signature verifying the disability. Applicants are notified in writing of their application status within 21 days from receipt of a completed application. Riders who have the required ADA Certification Identification Card are eligible to use SunDial for their transportation needs, including medical appointments, shopping, and other social activities. Figure 1- shows the SunDial ridership trend for 2020 through early 2024.

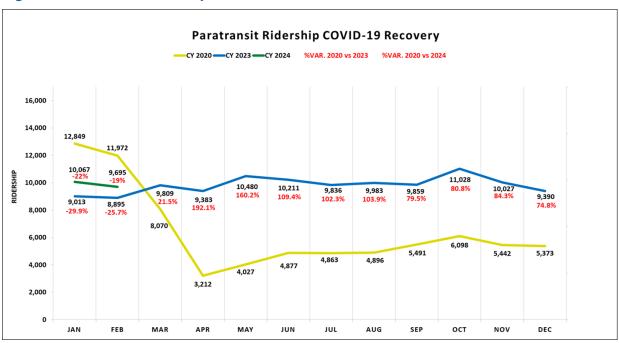

Figure 1-21 SunDial Ridership Trend

Employment is distributed throughout the service area but is concentrated adjacent to major roadways such as Highway 111. Palm Springs and Palm Desert have some of the highest levels of employment density. Figure 1- shows the locations of selected employers. Figure 1- lists these major employers and their estimated number of employees by map ID.

#### 1.3.5 Taxi Administration

The SunLine Regulatory Administration is charged with licensing and regulating taxicab businesses and drivers in the Coachella Valley.

#### 1.4 Current Fare Structure

In 2002, SunLine raised its base cash fare from 75 cents to \$1. In 2011, a SunLine fare study recommended both eliminating the 25-cent transfer fare and incrementally raising the base cash

fare to \$1.50. These recommendations were not implemented. The SunLine Board of Directors has directed staff to explore fare-free operations.

Figure 1- shows the existing SunLine fare structure. This fare structure differentiates fares for specific transit customers and trip types, which shows how SunLine is targeting specific market segments with discounts to increase the system's ridership and revenue. For example, SunLine provides a discounted 31-day youth pass for students using transit.

#### 1.4.1 Cash Fares

In addition to the \$1 fare for adult riders, SunLine enforces a 25-cent fee for transfers. The transfer pass is good for unlimited rides within 2 hours of purchase and is valid only on the day issued. Transfers are issued only upon boarding.

The base cash fare for seniors, which SunLine defines as individuals 60 years of age or older, is 50 cents on all fixed route services. Individuals who qualify for the ADA also pay a 50-cent base cash fare on all fixed route services. The fare complies with FTA's Half Fare rule, which requires agencies receiving federal funds to offer fares to persons 65 or over and disabled travelers at a level no more than half the base cash fare. Medicare cards, Department of Motor Vehicles driver's license or senior ID cards, ADA certification cards, or SunLine Half Fare ID cards are accepted as proof of age or disability.

A discounted youth fare of 85 cents is also available for children between the ages of 5 and 17. Children 4 years of age and younger ride free with a paid adult cash fare (maximum of two children).

Figure 1-24 Fare Structure

SHORT-RANGE TRANSIT PLAN

#### 1.4.2 Fare Passes

SunLine currently issues three types of fare passes: the Day Pass, 31-Day Pass, and 10-Ride Pass. Daily and monthly passes are available for the 10 Commuter Link service as well but are priced and sold separately from the general fixed route passes. SunLine also partners with employers and schools to offer passes to employees and students, respectively.

#### Day Pass

The SunLine Day Pass is available for \$3 and allows for unlimited rides on all fixed routes for the duration of 1 calendar day. In adherence to FTA's Half Fare rule, the Day Pass for seniors and disabled riders is available for \$1.50. The Day Pass for youth riders is \$2. The Day Pass for the 10 Commuter Link is \$14 for adults and \$10 for seniors.

#### 31-Day Pass

SunLine sells a pass valid for a rolling 31-day period from the date of first use. The 31-Day Pass is available for \$34 for general adult riders, \$17 for seniors and disabled riders, and \$24 for youth. The monthly pass for the 10 Commuter Link is a 30-day pass available for \$150 (the 10 Commuter Link operates Monday through Friday only).

#### Multiple Ride (10-Ride)

A 10-Ride Pass is available for \$10 for general adult riders, \$5 for seniors and disabled riders, and \$8.50 for youths (ages 5 to 17). There is no discount from the base cash fare for this pass.

#### **Employer Passes**

SunLine offers a 31-Day Pass to businesses in the Coachella Valley with five or more employees interested in using transit. The pass can be used for unlimited rides on any of SunLine's fixed route services and is priced at \$24 a month. The pass is \$10 less than the 31-Day adult pass and is designed to encourage greater use of alternative modes of transportation.

#### Haul Pass

In August 2018, SunLine launched its Haul Pass Program to improve student access to Coachella Valley's colleges and university. Both the College of the Desert and the CSUSB Palm Desert Campus are partners. To ride SunLine, students at these schools can simply swipe their active student ID card through the SunBus card reader when they board. The program began after receiving a grant from California's Low Carbon Transit Operations Program (LCTOP) program and was expanded in August 2021 to provide free local service to all high school students in grades 9 to 12. High school students interested in the High School Haul Pass must submit an application form. Additional information is provided on the Haul Pass program page (https://www.sunline.org/fares-passes/haul-pass).

#### **Token Transit**

SunLine riders also have the option to download the Token Transit application to their smartphone and use it to pay SunLine fares. It requires a credit, debit card, Google Pay, Apple Pay and other forms of digital payment to set up an account and purchase bus passes but includes the benefit of being compatible with other transit agencies across the country.

#### 1.5 Revenue Fleet

SunLine's fleet includes fixed route buses, paratransit vehicles, and support vehicles. SRTP Table 1.1 (see SRTP Tables) shows the characteristics of SunLine's fixed route and paratransit fleet. Figure 1- summarizes SunLine's fleet of support vehicles.

Figure 1-25 SunLine Support Vehicle Summary

| Type of vehicle                             | Fuel type | Number of vehicles |

#### 1.6 Existing Transit Facilities and Bus Stop Amenities

SunLine operates administrative and bus operations facilities at two locations. The administrative headquarters and main bus operations are located at 32-505 Harry Oliver Trail in Thousand Palms. SunLine also operates a maintenance and fueling facility at 83-255 Highway 111 in Indio. Park-and-ride facilities are located at 78-420 Varner Road in Thousand Palms and at 83-255 Highway 111 in Indio.

SunLine's bus system has 571 stops with 415 shelters. In addition, there are 81 stops with stand-alone benches and 270 stops with waste containers. Figure 1- shows the number of stops and stops with shelters by city or district.

# 1.7 Existing Coordination Between Transit Agencies and Private Providers

As the designated consolidated transportation services agency, SunLine coordinates public transportation services throughout its service area. Agency staff participate in meetings with social and human service agencies, consumers, and grassroots advocates through forums such as the Riverside County Transportation Commission (RCTC) Citizens and Specialized Transit Advisory Committee, SunLine's ACCESS Advisory Committee, San Gorgonio Pass Area – Transportation Now Coalition, and hold ongoing dialogue with neighboring transit operators.

SunLine facilitates the ACCESS Advisory Committee. Agency staff host regular meetings at the Thousand Palms administrative office, wherein SunLine uses input from the committee to improve relationships with the community to address public transportation issues in the Coachella Valley.

Additionally, staff members are actively involved in the regional transportation planning process through participation on RCTC, County and SCAG-led committees. These committees include the Specialized Transit Advisory Committee, the Technical Advisory Committee, Aging & Disability Resource Connection of Riverside Long-term Services and Supports Coalition, Desert Valley Builders Association, and related committees to enhance coordination efforts with SunLine.

#### 1.7.1 Coordination with Other Public Transportation Providers

In addition to providing transit service throughout the Coachella Valley, SunLine offers transit connections to several adjacent transit operators. SunLine maintains interagency agreements between Riverside Transit Agency, Omnitrans, Metrolink, and California State University to coordinate the operation of the 10 Commuter Link service, which connects Indio/Palm Desert to the CSUSB campus and the SBTC/Metrolink Station, with an intermediate bus stop in Beaumont.

SunLine also hosts Basin Transit's Routes 12 and 15 through a cooperative service agreement at its stops in downtown Palm Springs. The collaboration offers connections to Yucca Valley, Landers, Joshua Tree, and Twentynine Palms.

SunLine continues to collaborate with the Palo Verde Valley Transit Agency on its RidePV Express service (formerly known as the Blythe Wellness Express). This service, which originally launched in July 2017, operates 3 days per week and travels to the Coachella Valley's three hospitals (Desert Regional Medical Center, Eisenhower Medical Center, and John F. Kennedy Memorial Hospital) within SunLine's service area.

Amtrak Thruway (operated by Amtrak bus contractors) transports rail passengers traveling between rail hubs at certain Amtrak stations and SunLine's bus stops in Palm Springs, Palm Desert, and La Quinta under an additional cooperative service agreement. Amtrak's Sunset Limited intercity train serves the Palm Springs Station on North Indian Canyon Drive. However,

with rail service only serving Palm Springs three times a week in each direction and arriving in the middle of the night, it is currently impractical for SunLine to offer transit service to the station.

SunLine collaborates with the Imperial Valley Transportation Commission (IVTC) in an effort to find a future connection with Imperial Valley Transit (IVT). IVTC oversees the regional transportation services and programs provided by IVT in the Southern California areas of Brawley, Calexico, Imperial, West Shores, and El Centro.

SunLine maintains an interagency operating agreement with FlixBus, first established in 2019. FlixBus initiated regional bus service at Palm Springs and Indio that connects to Los Angeles in the west and Phoenix, Arizona, in the east.

#### 1.8 Review of Previous Studies and Plans

The California Department of Transportation awarded SunLine its 2021 Excellence in Transportation Award in the Public Awareness Category in recognition for its Refueled initiative. The Refueled initiative started in 2019 when SunLine completed its *Transit Redesign and Network Analysis Study*. Prepared by HDR, this study took a comprehensive look at fixed route transit operations to make recommendations to optimize SunLine's service. SunLine also completed an on-board transit rider survey in 2019. This survey provided insight into rider preferences and needs to help guide the transit redesign. In 2022, SunLine retained HDR to conduct a *Before and After Study*, which evaluated the impact of the network redesign and how the needs of riders have changed through the pandemic. Those findings have continued to inform the development of the Agency's SRTP over the last few fiscal years.

# CHAPTER

& Existing Service Route Performance

SunLine SHORT-RANGE TRANSIT PLAN

## **Chapter 2. Existing Service and Route Performance**

In January 2023, the Board of Directors approved the revised SunLine Service Standards Policy to provide Agency staff with direction regarding the planning, operation, and management of transit service in the Coachella Valley. The Service Standards Policy and accompanying metrics are intended to:

- promote continuous improvement of transit service
- provide regular updates on service performance
- meet federal requirements for monitoring Title VI of the Civil Rights Act
- avoid uninformed decision-making regarding the provision of service

The FY21-23 SRTP included updated key performance indicators (KPIs) that further support these quantitative, community-based planning methods. As we emerge from the pandemic, it will be more important than ever for SunLine to grow ridership while making necessary adjustments based on ridership trends.

#### 2.1 Service Standards

#### 2.1.1 Service Design Standards

Service frequency and span of service can be revised where sustainable (that is, where demand warrants increased frequency, where performance measures can still be met, and when funding can sustain the frequency and span of service).

New routes may be implemented based on a weekday-only service, typically between the hours of 6:00 A.M. and 7:00 P.M., usually when there is a peak demand. During the implementation of new service, a trial period is allocated from 12 to 18 months as an opportunity to provide for service adjustments before deciding to retain, expand, or eliminate the service. Figure 2-1 lists the minimum service frequencies and spans.

Figure 2-1 Service Frequency Standards

| Frequency and Span by | Frequency of        | of Service | Span of Service |                 |  |
|-----------------------|---------------------|------------|-----------------|-----------------|--|
| Service Type          | Weekday             | Weekend    | Weekday         | Weekend         |  |

| services              | demand              | demand     | baseu on demand | Daseu on demand |  |

#### **Network Role**

New services should be evaluated for their place in the overall transit network. Each new route in the network will have a unique role, whether it is facilitating transfers with existing services, introducing service coverage to a recent development, or providing connections between current routes and major destinations. While successful new routes connect with existing services, they should not duplicate existing service or compete for passengers.

#### **Market Opportunities**

There is a strong correlation between service performance, surrounding population, and employment densities. In other words, the more people with access to a route, the higher the route's potential ridership. Population-dense areas tend to coincide with mixed-use neighborhoods, walkable environments, and higher populations of transit-friendly constituencies such as students, seniors, zero-vehicle households, and low-income populations. The minimum population and employment density for the introduction of new all-day fixed route transit service is an average of 10 people/jobs per acre within a half mile of the proposed route.

A minimum threshold is considered supportive of fixed route service and should not be subjected to further analysis. Areas in this category that have unmet needs may be served by alternative options to fixed route service.

#### **Unmet Mobility Needs**

SunLine will strongly consider the mobility needs of transit-dependent populations when evaluating where to operate service. In assessing the area's demand for transit service, it is important to examine the presence of these demographic groups and identify any unmet needs.

#### Productivity vs. Coverage Target

The SunLine Board of Directors' goal is to capture choice riders and new riders and to expand transit market share. The Board is committed to investing in new operating plans that improve productivity and, when necessary, improve coverage. This is consistent with the Transportation Development Act of 1971 that established fiscal performance requirements of 20 percent of farebox recovery in urbanized areas and 10 percent in rural areas. To comply with this state mandate, and to improve effectiveness and efficiency, SunLine recommends the following policy for service deployment:

- Seventy percent of fixed-route service should be deployed in areas with higher population and employment densities where transit is able to meet productivity standards.
- Thirty percent of fixed-route service should be deployed to maintain coverage in areas where lower population and employment densities limit transit service productivity.

#### **Key Destinations**

Key destinations likely to generate higher demand for transit service include major area schools, colleges, universities, hospitals, retail/commercial/entertainment centers with more than 10 people/jobs per acre, open residential communities, and those with relatively lower income and vehicle ownership levels.

#### 2.1.2 Service Productivity Standards

Passengers per revenue hour and passengers per revenue trip are KPIs that measure service effectiveness, or productivity, based on ridership (passenger boardings) generated for each hour of revenue service for local and trunk routes and boardings per trip for market-based services operated (see Figure 2-2).

Figure 2-2 Passengers Per Revenue Hour/Revenue Trip Standards

<sup>\*</sup> Boardings per trip – is the productivity measure for market-based routes

#### 2.1.3 Service Quality Standards

Service quality standards contribute to the reliability and consistency of service delivery. Customers may first be attracted to transit service based on headway and span. Choice riders may continue to use services because they know they can get to their destinations on time—unreliable service usually results in decreased ridership. Service quality standards are proposed to be measured using the following operational and passenger experience metrics:

- service scheduled speed (service quality)
- on-time performance (service reliability)
- runtime variance (service reliability)
- percent service completed (service reliability)
- miles between service interruption (service reliability)
- load standards (service comfort)
- average fleet age (service comfort)
- bus deployment standards

Each suggested metric is discussed in more detail below.

**Service Scheduled Speed**: Measures the route's scheduled service speed. The measure is calculated from dividing revenue miles by revenue hours for each route. This KPI monitors services needed to maintain reasonable speed to retain and grow ridership.

The target performance scheduled speed is 12.5 miles per hour (mph) for SunLine's transit system, as shown in Figure 2-3.

Figure 2-3 Service Scheduled Speed Standard

| Service Mode    | Service Speed - Weekdays | Service Speed - Weekends |
|-----------------|--------------------------|--------------------------|
| Fixed Route Bus | 12.5 MPH                 | 12.5 MPH                 |

On-time Performance: This KPI measures service reliability as defined by adherence to the published service schedule. "On-time" is when a trip departs a time point within a range of 0 minutes early to 5 minutes late. For SunLine to achieve targeted on-time performance, service running times need to be calibrated regularly based on existing conditions. SunLine has a relatively uncongested operating environment, which helps support a high KPI for on-time performance. Some challenges to on-time performance are related to construction, heavy traffic, and passenger problems.

On-time performance standards for fixed routes are at a target of 85 percent (Figure 2-4).

Figure 2-4 On-Time Performance Standard

| Service Mode    | On-Time Performance Standards |
|-----------------|-------------------------------|
| Fixed Route Bus | 85% (Excepting Major Detours) |

Runtime Variance: Runtime is the time allotted in a transit schedule for a route to travel from one time point to another time point, or from beginning to end. Calibrating the runtime for the day of the week and hour of the day (for example, peak vs. non-peak) helps routes and the overall system adhere to or surpass the adopted on-time performance. It is important to review runtime variance regularly because roadway traffic conditions are ever-changing.

**Percent Service Completed**: Percentage of service completed is a metric established as of September 2017. The initial intention was to report percentage of trips completed; however, because of limitations in the Avail ITS system, the percentage of revenue mileage completed is reported.

This KPI measures service reliability as defined by the percentage of miles completed daily. Three components are necessary to successfully complete scheduled service:

- daily availability of operators to meet service demands
- daily availability of fleet vehicles to meet service demands
- miles between service interruptions

The set standard for service completed is 99 percent by service mode, as seen in Figure 2-5. The percentage of service completed for FY 22-23 was 98 percent, failing to meet SunLine's minimum service standard. We credit this minor shortcoming due to a lack of workforce and revenue buses available that caused loss in service.

Figure 2-5 Service Completed Standard

| Percentage of Service Completed Service Mode | Service Completed<br>Minimum Standard |
|--|---------------------------------------|
| Fixed route bus                              | 99%                                   |

**Miles between Service Interruptions**: This KPI measures service reliability as defined by revenue miles between service interruptions, regardless of the cause. To meet this target, both avoidance of service interruptions through early identification (for example, planning for detours, proper fleet maintenance) and timely response to service interruptions that do occur are necessary. The set minimum target between service interruptions (road calls) is 5,000 miles, as seen in Figure 2-6.

**Load Standards**: This service quality KPI establishes load standards for various vehicle types and is measured for each trip operated. While it may be acceptable for some riders to stand for short distances or time periods (for example, under 2 miles or 10 minutes) during peak periods, it is expected that seating should be available for all riders during normal off-peak conditions (Figure 2-7).

Figure 2-7 Load Standards

| Load Standards<br>Service Period | Maximum Consistent Load Factor                   |
|----------------------------------|--|
| Peak                             | Average over 133% of seated load = 50 passengers |
| Off Peak                         | Average over 100% of seated load = 38 passengers |

Average Fleet Age: The age of the vehicle fleet affects the performance and reliability of transit services and the attraction of customers. Adhering to the average fleet age requirement will ensure a consistently safe, reliable, and comfortable passenger experience (Figure 2-8).

Figure 2-8 Average Fleet Age Standard

| Vehicle Average Age  | Average Fleet Age        |
|----------------------|--------------------------|
| Standard Transit Bus | No greater than 10 years |

**Bus Deployment Policy**: This policy specifies the kind of vehicle that should be used to operate individual routes. The type of vehicle deployed on a route depends primarily on ridership demand and trip loads (Figure 2-9). Using incorrectly sized vehicles on routes can unnecessarily add operating cost to a route or result in overcrowding.

Figure 2-9 Bus Deployment Standard

| Bus Deployment        | Vehicle Type                                 |
|-----------------------|--|
| Trunk Bus Routes      | 40' Buses                                    |
| Local Bus Routes      | 32' or 40' Buses - Based on ridership demand |
| Market-Based Services | MCI Coach                                    |

SunLine reviews the Bus Deployment Policy every 2 years (effective since 2018) and make necessary adjustments as the fleet is updated to ensure compliance with the Title VI requirements.

#### 2.1.4 Service Warrants

The Warrants Standards provide guidelines for the introduction of new services. They are a tool for judging when new service or service extensions are appropriate. A new fixed route or route extension could be introduced when the ridership forecasts based on population, school enrollment, or job density are sufficient to achieve minimum passengers per revenue hour standards by service type. To ensure the Agency's financial sustainability, SunLine will introduce only those new services that operate above the lower-performing route quartile or with productivity that is within 15 percent of the system average.

Planning new services around these guidelines will help ensure the successful performance of new routes. Providing a set of guidelines for which areas warrant all-day fixed route service will help SunLine respond to future community requests for new service.

#### **Evaluating New Services**

New routes should be monitored to determine whether they are reaching the desired performance standards. The route should first be evaluated after 6 months to determine whether it meets more than two-thirds of its performance standards. New services not meeting the minimum standards at the end of an 18- to 24-month trial period are subject to corrective action or discontinuation

In some cases, trial periods for new services may vary based on the requirements of grant funding. For example, if a grant provided 3 years of funding for a route that did not meet standards, this route may still be operated for the full 3-year period.

#### 2.1.5 Paratransit Service Standards (SunDial)

#### Eligibility

- Any person with a disability who is unable to board, ride, or disembark from an
  accessible vehicle without the assistance of another person is eligible.
- Any person with a disability who has a specific impairment-related condition that prevents the person from traveling to or from a boarding/disembarking location is eligible.
- Certification is based on an individual's functional ability to ride the fixed route system.
- Visitors qualified elsewhere in the United States may use the SunDial ADA service for up to 21 days per year and must then qualify locally.
- A maximum 21-day response period for the application and an appeals process exists.
- There is no limit to the number of trips a person can make. Reservations can be made up to 7 days in advance.
- A no-show policy exists for passengers who do not appear for their rides, with possible exclusion from SunDial service for a period of time in extreme cases.

SunLine's Eligibility Department processed 100 percent of completed applications within the 21-day target.

#### Access

 The agency must serve any origin and destination requests that are both within 0.75 miles of a fixed route corridor (excluding commuter bus service) at the times and days of service when the fixed route is operating. Next-day service by reservation during regular business hours must be provided.

• The reservations call center accepts client reservations 7 days per week between 8:00 A.M. and 5:00 P.M. for next-day service.

#### **Travel Time**

 Trip pick-up time must be scheduled within 1 hour before or after the requested pick-up time. Trip length should be comparable to the time it would take to make the same trip by the fixed route service.

#### **On-time Performance**

- Trip pick up should consistently occur within a 30-minute window from the scheduled pick-up time.
- On-time performance is in accordance with FTA Circular 4710.1 to perform equivalent to SunLine's fixed route service. Paratransit continues to meet and exceed this goal.

#### Capacity

- Subscription service is provided as a proportion of our total complementary paratransit service as long as it does not interfere with our capacity for demand trips.
- No more than 50 percent of the number of trips can be subscription. Going above this level could cause capacity constraints to serve our non-subscription riders.
- Staff ensures subscription trips are balanced with non-subscription trips to ensure adequate levels of service are provided on a daily basis.

#### **Fares**

- Fares charged may not exceed twice the non-discounted fare for the fixed-route network at the time of the trip.
- No fare is to be charged to personal care attendants where they are required.
- Companions pay the same ADA fare.
- SunDial fares are based on travel within one city or multiple cities. Within one city the fare is \$1.50 per trip; travel within multiple cities is \$2.00 per trip.

#### **Major Trip Generators**

The 2019 SunLine Transit Agency Rider Survey identified the main transit trip generators in the Coachella Valley. The top destinations for home-based work trips are Palm Springs, Palm Desert, and La Quinta. The College of the Desert and Palm Springs High School are top destinations for home-based other trips that include shopping, recreation, and education. SunLine's service design should focus on serving major trip generators and creating convenient, direct linkages between origins and destinations.

#### 2.2.2 Route-level Performance

#### **Productivity**

Figure 2-19 indicates that neither of the two trunk routes (Routes 1 and 2) met their performance standards.

Figure 2-19 Trunk Routes Average

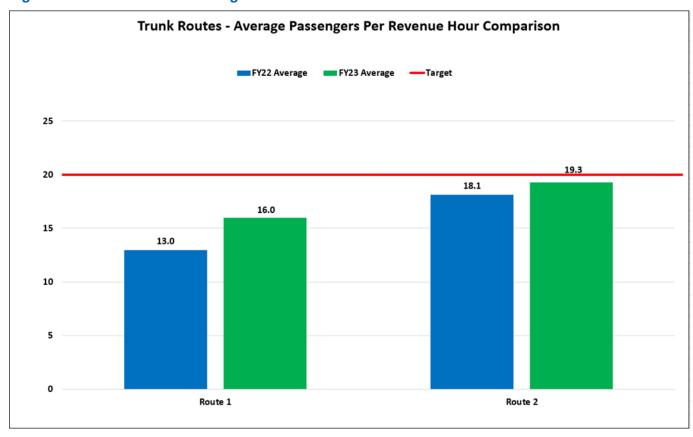

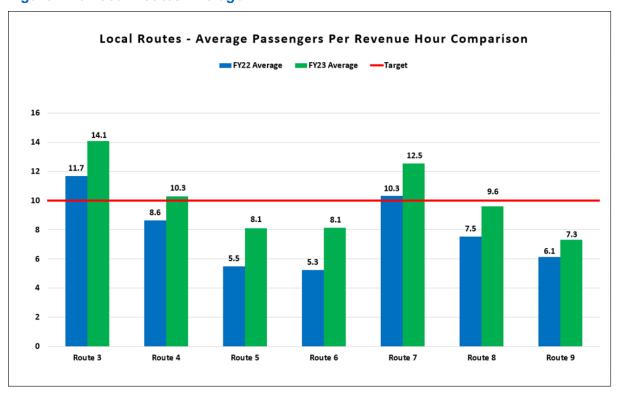

Figure 2-20 indicates that three out of the seven local routes met their performance standards goal:

- For FY22-23, Routes 3, 4 and Route 7 met the PPRH goal of 10 passengers per revenue hour
- For FY22-23, Routes 5, 6, 8 & 9 failed to meet the target of 10 PPRH

Route 10 Commuter Link service started revenue service in July 2022 and is currently meeting its goal of 10 passengers per revenue trip (Figure 2-21).

#### **Service Quality**

Service Scheduled Speed: The SunLine system is currently scheduled at an average speed of 16 mph, above the target scheduled speed of 12.5 mph (Figure 2-22).

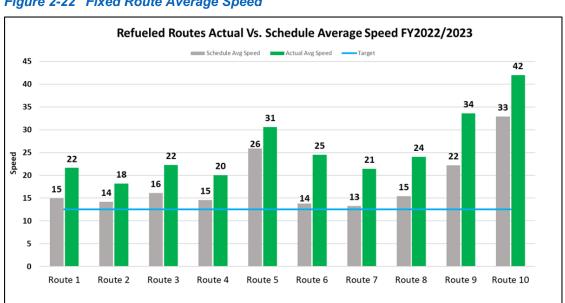

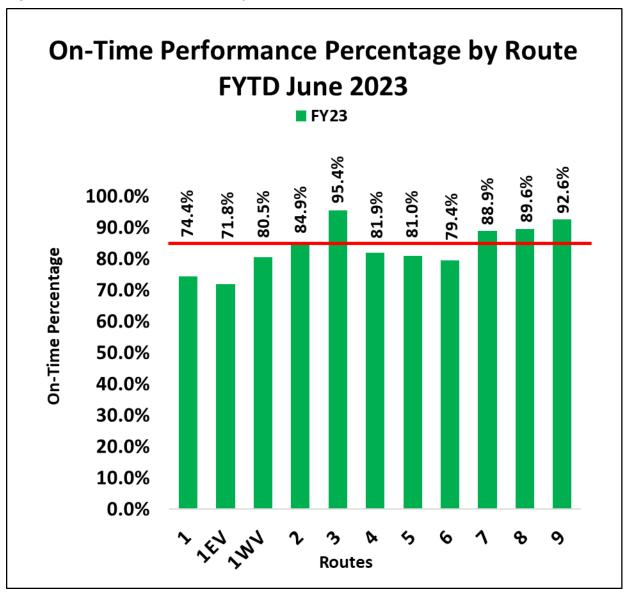

Figure 2-22 Fixed Route Average Speed

On-time Performance: SunLine's system-wide on-time performance is at 84 percent for July 1, 2022, to June 30, 2023. The Agency did not meet its goal for FY 22-23. Routes 2, 3, 7, 8 and 9 met the minimum on-time performance standard as captured in Figure 2-23.

Figure 2-23 On-Time Performance, by Route

**Miles between Service Interruptions**: The standard of 5,000 miles between service interruptions were exceeded throughout the review period. Miles between service interruptions for FY 22-23 are noted in Figure 2-24.

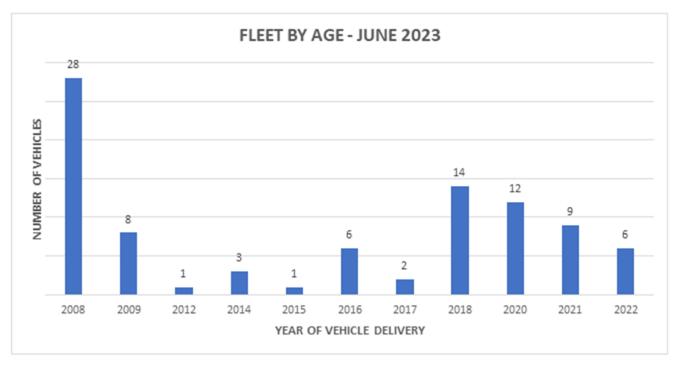

Figure 2-24 Miles between Service Interruptions

| FY2022/23 | Fixed Route Miles<br>between Service<br>Interruptions |

| April     | 9,244   |
| May       | 8,290   |
| June      | 11,076  |

**Average Fleet Age**: The fixed route average fleet age is 8.4 years. SunLine continues to replace buses in the fleet that have met their useful life. Figure 2-25 shows the fleet age as of June 2023.

Figure 2-25 Fleet Age

**Bus Deployment**: SunLine is in full compliance with Title VI, which protects people from discrimination based on race, color, and national origin in programs and activities receiving federal financial assistance. SunLine ensures equitable distribution of its assets in delivery of transit services to the people of the Coachella Valley.

Buses are assigned according to successful completion of maintenance functions without regard to route assignment, or vehicle age, except in size considerations as outlined in the Bus Deployment Policy described previously. Additionally, fuel cell buses and battery electric buses are assigned to routes with shorter distances and/or durations that are within the acceptable range capacity of those vehicles.

Adequate numbers of buses are assigned to routes with high demand to avoid instances of overcrowding or standing passengers. All SunLine buses are fully air-conditioned and are 100 percent accessible to persons with disabilities.

- Routes 1, 2, 3, and 4 should use 40-foot buses given the higher passenger volumes.
- Other routes should use either 40- or 32-foot buses based on ridership demand.

#### 2.2.3 Productivity Improvement Efforts Underway

SunRide has grown as a microtransit program from connecting riders to fixed route service by bridging the first mile, last mile gap, to including virtual stops within each geo-fence. Virtual stops consist of medical facilities, pharmacies, banks, grocery stores, educational facilities, and community services, such as libraries and senior centers.

Several efforts are underway to continue growing SunRide ridership. This includes outreaches in the geo-fences, walkabouts to local businesses, medical centers, and community organizations within each geo-fence to introduce SunRide as a transportation option, working with vehicle drivers on SunRide van awareness and recognition, as well as promotional offers such as free rides.

SunRide has been utilizing a more feature-rich mobile app since January 2022 that offers enhanced data analysis via KPIs and customer features, such as a five-star rating system and time snapping—the ability to time rides for minimal wait time to a fixed route bus. Additionally, drivers and customers now have the ability to contact each other for ride clarification questions.

To monitor the growth of SunRide, along with the effectiveness of marketing toward brand awareness, KPIs are monitored weekly and monthly to determine strengths, as well as areas where growth is needed. Regular monitoring of SunRide KPIs also assists in interceding and reversing any downward trends in ridership.

# CHAPTER 3

**Future Service** Plans, Fare Changes, **Capital Planning** & Marketing

SunLine SHORT-RANGE TRANSIT PLAN

# Chapter 3. Future Service Plans, Fare Changes, Capital Planning and Marketing

As an agency of firsts, SunLine has remained committed to building a truly intermodal, clean, and sustainable transportation network in partnership with local jurisdictions, regional and federal governments, and the private sector to develop, finance, and implement strategies to attract choice riders, expand SunLine's market share, and increase ridership. SunLine continues to progress on the following strategic action items, discussed further in this chapter:

- Expand the SunRide program to establish a lifeline service in areas hard to serve with traditional fixed route service.
- Complete construction of the Coachella Mobility Hub with a proposed ready for service date of September 2024, or earlier, upon completion of construction.
- Through an ongoing bus stops and amenities improvement program, replace outdated bus stop shelters and amenities, add new bus shelters and amenities according to policy, and address non-emergency safety and accessibility improvements. Continuous improvement of bus stops and amenities is essential to maintain and improve the first impression of SunLine where current and potential passengers and the community connect with SunLine.
- Continue with SunLine's ongoing improvement, communications, and education
  programs to enhance collaborative planning efforts that protect the integrity of the transit
  network and benefits of transit—that is, improve the experience of the entire journey.
- Update bus stop signs systemwide to ensure bus stops are easily identifiable, clean, accessible, and welcoming. To complement this program, SunLine is also updating bus stop signs with new information to connect with real-time bus arrival information and schedules necessary to complete the transit trip. These improvements are essential to attracting choice riders and expanding the transit market by making it convenient to use transit.
- Capitalize on the CVLink multimodal corridor, which has the potential to connect neighborhoods to transit, activity centers, and address some of the first- and last-mile mobility needs of the Coachella Valley.

#### 3.1 Service Plans and Priorities FY 2025 to FY 2027

The fixed route network is functioning well, notwithstanding the impact of the pandemic and the national shortage of coach operators. Few service changes are proposed in the short term, such as realigning routes to serve the new Coachella Mobility Hub, and developing options to serve the Acrisure Arena.

NS: No Service

#### 3.1.1 East of I-10

Development in the Coachella valley continues to expand east of I-10.

#### 3.1.2 Coachella Mobility Hub

Routes 1, 6, and 8 currently connect at the Transfer Terminal at Vine Avenue and Fifth Street in Coachella. A new Coachella Mobility Hub at Fourth Street and Cesar Chavez Street is projected to be ready for service in September 2024. The Mobility Hub will provide a residential development, bus laybys, passenger amenities, and connecting pedestrian and bicycle paths. Following completion of the Mobility Hub, the current routes at the Vine Avenue Transfer Terminal should be refocused to serve the Coachella Mobility Hub.

#### 3.1.3 Route 10 Commuter Link

Route 10 originates in Indio and terminates at the SBTC/Metrolink Station in downtown San Bernardino. Intermediate connections are made with California State University in Palm Desert, the Walmart Center in Beaumont, and CSUSB. There are four westbound and four eastbound trips each weekday, with no service on weekends or holidays.

Route 10 is a key service linking multiple transit routes, community services, and educational facilities in the eastern valley. Of concern is the unbalanced nature of the Route 10 ridership, with strong peak-direction ridership and little ridership on the return trip. Marketing and incentivizing reverse-peak-direction travel could improve the overall route's productivity.

To improve ridership on Route 10 Commuter Link, SunLine implemented off-peak fares for reverse commute trips. The local fare structure applies to morning trips from San Bernardino to Indio and afternoon trips from Indio to San Bernardino. The peak period fare remains unchanged. To help promote the service, the local fare structure also applies in the off-season when California State University is not in general session.

#### 3.1.4 School Trippers

School trippers are provided to augment certain routes or areas to ensure the base routes are not overcrowded. They may also provide a more direct route to specific schools. A single well-utilized school tripper bus may be a very productive service; however, it is critical that these services are regularly reviewed to ensure they are required. If the base routes can accommodate the school ridership, then it is unproductive to add an overlay of school trippers.

#### 3.1.5 SunRide (Microtransit) Service

SunRide on-demand microtransit service is available in eight Coachella Valley zones, connecting passengers to the fixed route network or a destination within the zone. As SunLine gains experience operating microtransit services, the existing zones should be reviewed to ensure they serve the appropriate geographies. In FY2023 SunLine expanded the Desert Hot Springs/Desert Edge zone to include the Mission Lakes area and expanded the Cathedral City

zone to include the new veterans housing complex and Salvation Army on Landau Boulevard north of Ramon Road. In addition, there was a new zone created in the City of La Quinta to further enhance the service. Other service areas within the Coachella Valley should be assessed for new SunRide opportunities. These may be new service areas or existing fixed route substitutions.

#### 3.1.6 SunRide Future Service Plans

As the on-demand microtransit service increases ridership, geo-fence boundaries, hours of service, number of days of service, and vehicle requirements will be reviewed to determine appropriate changes to meet the growing needs of the Coachella Valley.

#### **Fare Changes**

In July 2021, the fare increased from the introductory fare of \$2 per person, per ride to \$3 per person, per ride to include a transfer to or from Fixed Routes 1 to 9. SunLine is exploring a variety of fare options, including a multi-ride pass, a monthly pass, a senior discount, as well as premium fares that might be linked with the Commuter Link or door-to-door service. Fare structures of microtransit service in Southern California agencies will also be considered for possible adjustments to fares or transfers from a one-time fixed route transfer to a fixed route day pass.

#### **Capital Planning**

To serve the growing needs of SunLine's on-demand microtransit service, additional wheelchair-accessible minivans may need to be purchased within the next 2 years. Because the life of the SunRide vehicles is projected to sunset at 7 years, the four 2018 vans purchased in 2020 will be ready to be replaced in 2027 when the useful life of the vehicle is reached.

#### Marketing

Marketing efforts to educate the public and promote SunRide as a first mile-last mile solution is needed in all geo-fenced areas. Street outreach teams are the best way to get the word out to the public on this service and this will continue in the coming year

The Agency has annually invested in digital and polygon advertising campaigns, including video and animated ads to promote SunRide and educate Valley residents. The polygon advertising campaigns target precise borders around specific locations in each geo-fence. Digital advertising campaigns, through Paramount, are featured in the *Desert Sun* and YouTube as video ads that play prior to reading an article or viewing a video, and as digital display ads on networks and platforms outside of USAToday.com and DesertSun.com, such as NBCPalmSprings.com, Alternet.org, and CelebWell.com. Digital and polygon advertising campaigns will continue each year to build brand awareness and introduce SunRide in new zones.

#### 3.1.7 Modifications to Paratransit Service

The provision of ADA services remains a challenge because it is costly. Efforts to mitigate the increasing expenses in demand-responsive service include revisions to the paratransit eligibility/certification process and continuing to monitor late cancellations and no-shows, which improves the availability of appointment time slots and makes SunDial service more efficient for customers. SunDial staff periodically (monthly) measure the systemwide average rate for that month to determine whether a particular customer has excessive late cancellations or no-shows. They then consider the customer's overall frequency of use and evaluate whether there is "a pattern of abuse" relative to how often that customer travels with SunDial.

# 3.2 SunLine's Overall Marketing Plans, Studies, and Promotions

In order to support the initiatives outlined in the SRTP, the Marketing Department will focus on the following key areas:

- 1. Help regain and build ridership among current, recent and lapsed riders
- 2. Identify and drive ridership among new riders
- 3. Build trust among stakeholders and the community to drive advocacy
- 4. Communicate SunLine's efforts in maintaining and continuing to improve on-time performance
- 5. Convey progress made in SunLine's clean fuels fleet initiatives
- 6. Collaborate across departments to help improve the customer experience for passengers and elevate SunLine's brand
- 7. Explore new ways to engage with the community through various outreach and event opportunities

#### 3.2.1 Target Audiences

In order for marketing efforts to resonate, analysis of target markets must be done, studying both who they are and what motivates them. Then, marketing materials must be customized to reach those target audiences. See Figure 3.3 for target audience analysis.

Figure 3.3 Target Audience Analysis

# 3.2.2 Marketing Strategies

There are several strategies for communicating with SunLine's various target audiences, and messaging will be tailored to connect with each of them based on their motivations as identified in the target audience analysis.

#### 3.2.3 Social Media and Website

After building a robust social media program in recent years, SunLine has increased regular communication directly to its target audiences (fans/followers of the Agency's social media platforms). Posts have been entertaining and informative – both key components of keeping followers engaged.

Transit Tuesdays offer a live event on social media that discusses pre-selected topics sharing important updates with riders. Other social media posts tie in history, education, places to visit, comedy, safety, and recognition. This variety in messaging keeps the platform interesting and worth following.

A newly re-designed website will be released before the end of FY24. The re-design considers the overall user experience by highlighting information that is necessary to have front and center; thus, allowing website visitors to find that information instantly. The new website also follows new web trends and practices and will provide an easier pass purchase experience.

#### 3.2.4 Advertising

Strategically utilizing SunLine's budget, an advertising plan that maximizes available advertising funds and incorporates innovative advertising strategies will be developed and implemented. It will utilize platforms such as digital, print, radio, streaming and TV media. The goal is also to promote all key messaging on internal advertising mediums, such as bus shelters and interior bus advertising.

#### 3.2.5 Rider/Community Input

A strong marketing program incorporates a strategy for listening to constituents. SunLine will create and facilitate surveys to gather input regarding major service changes and how they are being received in the community. This provides the opportunity to learn about any issues that may need to be addressed. Data gathered can be shared with all appropriate departments to help improve the customer experience.

#### 3.2.6 Public Relations

SunLine's public relations representatives will draft press releases to promote Agency initiatives. They will also pitch stories to the media to publicize key newsworthy items, coordinate media interviews and follow-up on media requests in a timely fashion.

#### 3.2.7 Customer Service Center/Website

SunLine's Customer Service Center includes LiveChat on the web for those who need immediate assistance or find it more convenient for their schedule to use this chat-based interface. The website has also been instrumental as a central resource for all communications and announcements disseminated by SunLine. In addition, the Customer Service Center offers phoneline support by customer service representatives Monday through Friday. Agents use

resources such as Google Transit Trip Planner and MyStop Bus Tracker to answer customer inquiries quickly and accurately. Bilingual customer service agents are available to assist with questions in both English and Spanish. Interpretation services for all other languages are available through our contract with LanguageLine. An interpreter can be accessed via phone, video or by using their app.

#### 3.2.8 Video Production

The Agency will continue to put an increased focus on the creation of videos as marketing tools, according to shifts in social media audience preferences. By developing an expanded library of video assets, SunLine will be able to initiate increased engagement with its target markets, and those individuals will better retain the information being shared through unique videos. The Marketing Department will also explore opportunities to produce longer video features, like those developed to recap the Student Art Contest event, where possible.

#### 3.2.9 Rider's Guide

The Rider's Guide has become an essential communications tool for SunLine. The Agency has maintained the layout of this revamped guide which has proven to be a more user-friendly format, featuring relevant information for riders and includes directions, maps, time point bus stop locations, schedules, fares, transfer instructions and how to receive assistance with SunLine's programs and services. Transit system information, which aligns with the updated Rider's Guide, can also be found at transit centers, on buses, at bus stops and community gathering locations. SunLine's system information is provided in both English and Spanish.

#### 3.2.10 Clean Fuels Fleet Communications

The Agency's reputation as a pioneer in clear air and alternative fuel technology must continue to remain top-of-mind by promoting news regarding SunLine's advancement in its Zero-Emissions Bus Rollout Plan. SunLine's new liquid hydrogen station will give the Agency increased reliability in fueling the Agency's hydrogen fuel cell technology fleet.

#### 3.2.11 Internal Communications

Keeping employees up to date on company initiatives and marketing efforts inspires higher morale and invites them to be involved in the bigger picture. To this end, SunLine will hold town

hall meetings and re-create its internal newsletter featuring key stories and facts about the Agency's latest initiatives. In alignment with our strategic plan, a component of the newsletter and town-hall-style meetings are educating staff on how our Agency works. Examples of topics include the various types of funding we receive; what the different funding can be used for; and how we get the data for planning our service. These efforts aid in improving communication with the employee target audience segment, making SunLine Transit Agency an even better place to work.

#### 3.2.12 Building an Effective Marketing Plan

All the tools mentioned above will be implemented to market SunLine as a leader in transportation, innovation, and alternative fuel technology. As stated, targeted messaging and the utilization of effective platforms and strategies will be pivotal to increasing ridership, rebuilding trust, communicating progress, and engaging employees.

#### 3.2.13 Community Outreach

SunLine works with local organizations, businesses, government agencies, and non-profit organizations to promote SunLine programs and services. Community outreach involves working with grassroots organizations to identify unmet transit needs and build community-based marketing partnerships. Historically, SunLine invests in these relationships by participating in community events such as mobility workshops, food drives, fundraisers, parades, and special event activities.

#### 3.2.14 Public Presentations and Town Hall Meetings

Target audiences include seniors, students, social services, businesses, and community leaders. The main goal is public education related to the economic and environmental benefits of using public transportation. During presentations, SunLine highlights the key role that we hold as a public transit provider and leader in alternative fuel technology. SunLine's use of hydrogen electric fuel cell and battery electric fuel cell buses have made positive impacts to the environment on a global scale. Presentations emphasize why this is important and how it affects residents of the Coachella Valley. These presentations typically occur at senior centers, colleges, government agencies (i.e. City Council meetings, SCAG, CVAG, etc.), and adult special needs schools and programs.

#### 3.2.15 Travel Training

Transportation provides us with a sense of independence and opportunities to engage within our community. SunLine's Travel Training Program offers opportunities for riders to learn how to independently navigate a public transit system. To this end, SunLine offers group and one-on-one training virtually, in-person and/or aboard a fixed route bus to build confidence and allow people to travel with ease.

#### 3.2.16 Transit Ambassador Program

The SunLine Transit Ambassador Program, known as TAP, empowers employees to expand SunLine's culture of customer service. TAP consists of a series of training sessions for SunLine employees that address crucial topics and everyday scenarios in public transportation service. A Transit Ambassador is one who has completed this program and can assist passengers with their trip planning. Transit Ambassadors will assist the rider until the rider feels confident in navigating the SunLine system independently.

#### 3.2.17 Access Advisory Committee

The Access Advisory Committee, which meets bi-monthly, was formed in 1995 as an advocacy group consisting of various agencies in the Coachella Valley. Committee members range from community activists to everyday transit users who are committed to promoting the successful implementation of the transportation provisions of the ADA and other related federal legislation or regulations.

#### 3.2.18 Free Ride Policy

SunLine will offer free rides on our local fixed route system on the days listed below:

- Transit Equity Day
- Earth Day
- Dump the Pump Day
- Car Free Day
- California Clean Air Day
- Rideshare Week
- Election Day

SunLine Transit Agency's Marketing team is developing a set of guidelines that will enable staff to determine, if any additional days can be added or when requests for free rides, can be accommodated.

### 3.2.19 Areas of Persistent Poverty and Historically Disadvantaged Communities

Transit is a vital service for disadvantaged populations in the SunLine service area. As discussed in Chapter 1, several census tracts in the SunLine service area meet the federal criteria to be designated as Areas of Persistent Poverty or Historically Disadvantaged Communities. Tribal lands, which are also considered Historically Disadvantaged Communities, are also located in the service area. As discussed in Section 3.3 below, disadvantaged populations are a core market for transit and have unique travel patterns. SunLine will consider these federal designations in its public outreach efforts and assessment of environmental justice when evaluating service improvements and funding opportunities.

# 3.3 Projected Ridership Growth (FY 2025 to FY 2027)

Following a significant downturn in ridership in March 2020 related to the COVID-19 pandemic, SunLine expects it may take several years for ridership to rebound. SunLine and its planning partners are using the regional travel demand model to prepare long-term ridership forecasts for the unconstrained transit redesign.

The SunLine Refueled before and after study identified several themes related to pandemic ridership recovery:

- Transit demand has been reduced by the pandemic, but not in an even manner. Lower-income riders and essential workers commuting to in-person jobs at all hours continue to depend on transit service. In contrast, the increase in telecommuting is anticipated to be sustained, although to an uncertain degree, resulting in reduced peak period demand for travel to central business districts. Agencies can respond by preserving frequent line-haul service throughout the day while deemphasizing costly peak-period service.
- Network redesigns that emphasize a set of frequent core routes, which SunLine
  Refueled did, have proven successful for other agencies, and this is the type of service
  that has performed best through the pandemic by meeting the needs of the
  disadvantaged populations that remain the "core" ridership base for transit agencies.
- Changes in vehicular travel patterns throughout the pandemic affect bus running time
  across the day and may require schedule modifications. Well-established practices, such
  as dedicated lanes and transit signal priority (TSP), can help agencies ameliorate the
  impacts of rising congestion and improve competitiveness in comparison with other
  modes. SunLine is participating in the ongoing SCAG Regional Transit Lanes Study,
  which includes Highway 111 as a potential corridor for TSP treatments.
- The untethering of jobs from offices has resulted in a shift toward living in suburbs and smaller urban areas, and the Coachella Valley is likely to continue growing faster than the Southern California region. As these population shifts drive development, SunLine will need to reevaluate which areas have sufficient population to support service and whether service levels are keeping up with growth in population.
- As transit ridership recovers, flexible, on-demand microtransit may be a more costeffective way to maintain service coverage in areas with low fixed route ridership.
  Microtransit can also have synergy with and improve the efficiency of paratransit service
  through sharing of vehicles and automation of trip assignments. SunLine and RideCo
  are evaluating the potential of expansion of SunRide service areas.

# 3.4 Proposed Fare Structure Changes

While the Board of Directors has directed SunLine staff to explore a fare-free system, the aim of this fare policy is to increase SunLine's revenues with a simplified structure that continues to

provide support for low-income individuals. Recent fare-related efforts and actions are discussed below.

#### Route 10 Commuter Link Off-Peak Pricing

To improve ridership on Route 10 Commuter Link, SunLine implemented off-peak fares for reverse commute trips. The local fare structure applies to morning trips from San Bernardino to Indio and afternoon trips from Indio to San Bernardino. The peak period fare remains the same. The local fare structure also applies in the off season when California State University is not in general session.

#### Haul Pass

The College of the Desert and CSUSB's Palm Desert Campus are important transit markets in our service area. Started in August 2018 with a grant from the LCTOP, the SunLine Haul Pass program gives students at these schools free access to SunLine buses with their student ID. The LCTOP grant is funding an expansion of the program to students who are enrolled in any Coachella Valley high schools. The program, which began with the 2021 school year, is anticipated to be available for 18 to 22 months with the goal of the program becoming self-sustaining in future years. All students who apply will be eligible to ride for free—not just to class, but anywhere SunLine buses go, anytime they operate.

#### **Mobile Ticketing**

The 2020 Refueled survey showed that more than 86 percent of SunLine riders have access to a smartphone or tablet with an internet connection. Access to a connected device was an important factor in the implementation of the Token Transit mobile ticketing. Mobile ticketing makes paying fares much easier. There's no need to carry coins or cash. No need to wait in line to buy a pass. And no need to search in a wallet for a buried bus pass. Customers can simply board the bus, use their phone to pay, and go.

#### **Best Industry Practices**

#### Review Fares Annually

Fares should be reviewed annually to assess the ridership impact. This should include an examination of revenue by fare category and fare media. The fare review should provide a peer comparison to help ensure fare policy decisions are well-informed.

#### Make Fare Adjustments as Frequently as Possible

Fares should be adjusted annually to address inflation and to deliver a more gradual change to riders. Fares that are frozen for several years and then adjusted through a large disproportionate increase result in a "shock" to riders that may negatively affect the Agency image and ridership.

# Calculate the SunLine Internal Rate of Inflation to Establish Required Fare Adjustments

Fare increases should be based on SunLine's internal rate of inflation (goods, labor, and fuel), rather than the inflation of a general Consumer Price Index. The Consumer Price Index measures the inflation on a basket of goods and services unrelated to transit service and competing transportation modes.

To help low-income passengers access transit services and offset fare increases, SunLine may target fares for Coachella Valley residents who meet low-income guidelines. The U.S. Department of Labor's Lower Living Standard Income Level is often used by transit agencies to determine eligibility for reduced fares. It identifies income levels by family size that are adjusted annually based on changes in the Consumer Price Index.

# 3.5 Capital Improvement Planning

California Air Resources Board's (CARB's) ICT regulation requires SunLine to gradually transition to a 100 percent zero-emission bus (ZEB) fleet. As SunLine grows its fleet to provide additional service, it will need to evaluate daily mileage needs and the incremental capital or electricity costs of depot-charging electric buses that cannot be offset by available incentive and funding programs. SunLine is also planning for the new infrastructure needed to support hydrogen production and refueling for its fuel cell buses. It is also evaluating expansion of its satellite facility in Indio to support hydrogen and ZEB fueling and maintenance.

SunLine is working with the Coachella Valley Association of Governments to plan and fund street improvements needed to preserve bus travel times and improve service reliability. These street improvements include TSP measures, queue jumpers, and dedicated bus lanes. Super stops are another capital improvement aimed at enhancing the passenger experience. These stops include enlarged and near-level boarding areas, enhanced shelters, and upgraded amenities.

SunLine is also working with its member cities to improve multimodal connections to its fixed route bus service. This includes connections to the CV Link. This bicycling and walking pathway links the Coachella Valley cities and the lands of three federally recognized tribes with a path that generally parallels Highway 111.

#### 3.5.1 Bus Stop Improvements

SunLine's current policy specifies that bus stops with more than 10 boardings per day warrant a shelter. Eight bus stops currently meet this threshold but lack shelters. SunLine anticipates funding availability to add 8 bus stop shelters in the next years.

Figure 3-2 summarizes the resulting allocation of bus shelters by jurisdiction. SunLine is committed to implementing these policy recommendations and installing the additional 8 shelters over the next 3 years.

SunLine S SHORT-RANGE TRANSIT PLAN

# **Chapter 4. Financial Planning**

The FY2025 financial planning process focused on prioritizing resources and alignment with the core strategic goal of regaining ridership and providing multimodal solutions. The team at SunLine brought their diverse insights to most effectively allocate resources to maintain essential services. The enclosed financial plan of the Agency is based on the best available financial projections and anticipated grants.

### 4.1 Operating and Capital Budget

In FY2025, SunLine will have an operating budget of \$49,417,378 and a capital budget of \$21,826,973 (Table 4 and 4A). The operating budget encompasses costs such as driver salaries, administrative salaries, fuel, insurance premiums, and other overhead costs required to run day to day operations. The available funding will be used effectively and efficiently in the accomplishment of organizational objectives. The operating budget will ensure that the Agency continues to offer safe and reliable transportation to Coachella Valley residents.

The capital budget incorporates key projects to help further advance the Agency's Capital Improvement Program. The Capital Improvement Program for FY2025 focuses on continuing SunLine's investment in replacing aging infrastructure and equipment. SunLine's Capital Program represents a unique opportunity to make long term investments in SunLine's operational capabilities, energy strategies, and regulatory compliance by conforming with the California Air Resources Board's Innovative Clean Transit mandate.

# 4.2 Funding Plans to Support Proposed Operating and Capital Program

For FY2025, funding plans for the proposed operating and capital programs are primarily funded as follows:

FTA Section 5307, FTA Section 5311, FTA Section 5311 (f) (Intercity), FTA Section 5339, Congestion Mitigation and Air Quality (CMAQ), California Air Resources Board (CARB), California Energy Commission (CEC), Air Quality Management District (AQMD), State Transit Assistance (STA), State of Good Repair (SGR), Low Carbon Operating Program (LCTOP), Local Transportation Funds (LTF), Local Measure A funding, Senate Bill 125 (Transit and Intercity Rail Capital Program) and farebox revenue.

The estimated FY2025 operating and capital budget of \$71,244,351 outlined in Table 4, is funded by:

|                                       | Operating |            | Capital     |    | al          |             |

# 4.3 Regulatory and Compliance Requirements

#### 4.3.1 Americans with Disabilities Act

SunLine complies with ADA guidelines by providing a 100 percent accessible revenue service fleet for fixed route transit services and ADA paratransit vehicles. As funding becomes available, SunLine continues to provide bus stop improvements to ensure accessibility. Staff also coordinates with developers and contractors regarding construction projects to include bus stop improvements when the opportunity arises.

#### 4.3.2 Disadvantaged Business Enterprise

SunLine's most recent Disadvantaged Business Enterprise (DBE) program and goal were submitted to FTA in July 2021 and had an expiration date of September 2024. The next DBE report will be submitted by August 2024.

#### 4.3.3 Equal Employment Opportunity

SunLine complies with federal regulations pertaining to employment and submits its Equal Employment Opportunity (EEO)-4 report annually to the U.S. Equal Employment Opportunity Commission (EEOC) and its EEO/Affirmative Action Program to FTA every 4 years, or as major changes occur in the workforce or employment conditions. The most recent EEO-4 report was submitted to the EEOC and certified in February 2024. The most recent EEO/Affirmative Action Program was revised and submitted to FTA in April 2024. The next update to the EEO/Affirmative Action Program is due to the FTA in March 2028.

#### 4.3.4 Title VI

Title VI protects people from discrimination based on race, color, and national origin in programs and activities receiving federal financial assistance. SunLine's Title VI report was submitted to FTA in January 2023 and has an expiration date of October 2025.

#### 4.3.5 Transportation Development Act

The Transportation Development Act provides two major sources of funding for public transportation: the LTF and STA. RCTC commissioned Michael Baker International to conduct the Triennial Performance Audit as required by the Transportation Development Act; recommendations from the auditors are referenced in section VI of that document.

#### 4.3.6 Federal Transit Administration Triennial Review

In accordance with regulations, SunLine completed an FTA Triennial Audit site visit in 2023 and is working with FTA to provide final closeout documentation on all outstanding items.

#### 4.3.7 National Transit Database

To keep track of the industry and provide public information and statistics as growth occurs, FTA's National Transit Database records the financial, operating, and asset conditions of transit systems. Staff submit monthly reports and a yearly report which is used for funding formulas.

#### 4.3.8 Alternative Fuel Vehicles

In alignment with SunLine's Board-approved Alternative Fuel Policy, all revenue vehicles in the fleet use CNG, electric, or hydrogen fuel. The current active fleet consists of 49 CNG buses, 26 hydrogen electric fuel cell buses, four (4) battery electric buses, three (3) CNG coaches, 39 CNG paratransit vehicles, and 52 non-revenue CNG, gas and electric vehicles, including general support cars and trucks.

Project Name: Feasibility Studies

Category: Planning/Feasibility

Sub-Category: Study

Fuel Type: N/A

<u>Project Description</u>: Sunline Transit Agency's Comprehensive Operational Analysis (COA) is an in-depth evaluation aimed at optimizing transit services and enhancing operational efficiency. This thorough analysis examines various aspects of the agency's performance, including route effectiveness, ridership patterns, service reliability, and customer satisfaction. A component of the COA will be to study the modernization of the agency's fare payment system. This section focuses on assessing current fare collection methods and exploring innovative technologies to streamline the payment process. The goal is to enhance convenience for passengers, reduce operational costs, and improve data accuracy. By leveraging data-dri ven insights and stakeholder feedback, Sunline Transit Agency's COA ensures that transit services are aligned with current demands and future growth, fostering a more reliable, accessible, and sustainable public transportation system.

<u>Project Justification</u>: The On-Board Origin-Destination Ridership Study is a crucial evaluation recommended by the Federal Transit Administration (FTA) to be conducted every 4 to 5 years. This comprehensive study involves collecting detailed data on passengers' travel patterns, including where trips begin and end, transfer points, and the duration of travel. By analyzing this data, the study aims to gain insights into ridership behavior, identify trends, and understand the demand for transit services across different routes and times. The findings help transit agencies optimize route planning, improve service frequency, and enhance overall efficiency. The study's insights are vital for making informed decisions about future transit developments, ensuring that services meet the evolving needs of the community and contribute to a more effective and user-friendly public transportation system.

RE: Adoption of SunLine Regulatory Administration FY25 Budget

## Recommendation

Recommend that the Board of Directors adopt the proposed fiscal year 2025 (FY25) budget.

## **Background**

In accordance with the SunLine Services Group (SSG) Joint Powers Agreement, the Board of Directors must approve an annual budget for SunLine Regulatory Administration (SRA). The FY25 budget was brought before the Taxi Committee and Board of Directors on May 22, 2024, for discussion before the required approval in June. There are no substantive changes from the draft budget presented at the May 22, 2024 Board meeting.

SRA is proposing a balanced budget of \$189,600 for FY25. The FY25 SRA budget reflects revenue estimates based on regulating three (3) taxi businesses. The expense estimates reflect a fiscally prudent budget across controlled expense categories.

### **Financial Impact**

The proposed budget is generated based on an expected collection of revenue to sustain SRA's regulatory mandate provided by the SSG Ordinance.

The SRA Taxicab Administrator handles adjudication of ordinance violations. These can involve taxi companies, licenses, or driver permits.

## **SunLine Transit Agency**

DATE: June 26, 2024 ACTION

TO: Board of Directors

FROM: Tamara Miles, Chief of Human Relations

RE: Approval of the Collective Bargaining Agreement (CBA) with

International Brotherhood of Teamsters, Local 1932 (Teamsters)

## **Recommendation**

Recommend that the Board of Directors approve the Collective Bargaining Agreement (CBA) between SunLine Transit Agency (SunLine) and International Brotherhood of Teamsters, Local 1932, (Teamsters), and authorize the CEO/General Manager to execute the CBA on behalf of SunLine.

### **Background**

Negotiations between SunLine's Negotiation Team and the Teamsters commenced with a kickoff meeting on March 18, 2024. The meeting included introductions, scheduling of future negotiation sessions, and the establishment of negotiation ground rules.

Official negotiations began on April 1, 2024, where SunLine and the Teamsters exchanged proposals and interests lists. Over the course of four (4) sessions, negotiations continued, culminating in a full tentative agreement on the afternoon of June 5, 2024. The tentative agreement was subsequently ratified by Teamsters members on June 10, 2024. Pending approval by the SunLine Board, the CBA will govern a three (3) year contract effective from July 1, 2024, to June 30, 2027.

A copy of the final CBA is attached for your reference.

## **Financial Impact**

Approval of this action will lead to an estimated expense increase of \$399,435 for the first year, \$153,632 in the second year and \$178,563 in the third year. The first-year cost represents less than one (1) percent of the operating budget.

Grievances may also be filed by individual bargaining unit members. There shall be no double or multiple grievances for the same set of circumstances.

Allegations of discrimination or hostile work environment are excluded from this grievance procedure. Disciplinary appeal procedures are covered under the Discipline Article of this Agreement.

Throughout this article, if the Chief of Human Relations or Department Manager delegates the grievance to a designee, the designee shall not be a party to the incident giving rise to the grievance.

#### 20.2 Grievance Procedure

No grievance shall be entertained or considered unless it is presented in the following manner.

#### 20.2.1 Step One – Informal Step

The employee or Teamsters shall file a written grievance form with SunLine within five (5) working days of the occurrence of an incident the employee claims is subject to this grievance procedure. The grievance form shall contain a statement of the pertinent facts and the provisions of the CBA allegedly violated and remedy sought and shall be filed with the Department Chief or his/her designee, via email, facsimile, or in-office mail.

The employee or Teamsters shall confer with the employee's Department Chief or his or her designated representative. The answer shall be delivered in writing, via email, facsimile, or in-office mail.

#### 20.2.2 Step Two CEO/General Manager

If the answer of the employee's Chief or his or her designee in Step One is unsatisfactory to the employee, the grievance shall be presented in writing and contain a statement of the pertinent facts and the provisions of the CBA allegedly violated and remedy sought to the CEO/General Manager or designee within five (5) working days of the manager's answer at Step One in writing, via email, facsimile, or in-office mail.

A written answer to the grievant and the Teamsters representative will be provided within twenty (20) working days after the meeting. The answer shall be delivered in writing, via email, facsimile, or in-office mail.

#### 20.2.3 Step Three – Request for Arbitration

If the Step Two answer is not satisfactory, Teamsters may request, in writing (email, facsimile or in-office mail) that the matter be heard by an arbitration board. The request shall state the nature of the dispute and the resolution sought. The request for Step Three review must be made within five (5) working days after the issuance of the Step Two answer.

SunLine and Teamsters shall each appoint a representative to the arbitration panel. As to the chairperson of the arbitration panel, SunLine shall request a list of five (5) arbitrators registered with the California State Conciliation Service or some other mutually agreed upon source within thirty (30) working days of Teamster's request. Teamsters may delete/strike two (2) names from the list within two (2) working days of receipt of the list. Teamsters' failure to strike the two (2) names within this timeframe shall constitute a forfeiture of the grievance. SunLine will then select the arbitrator from the remaining names on the list. The selected arbitrator shall serve as the chairperson of the panel.

Costs of the arbitration shall be shared equally between Teamsters and SunLine. The costs of the arbitration, including the court reporter, shall be divided in half (i.e., 50/50) by the parties. Attorney fees, staff time and witness fees shall not be shared between the parties and shall be paid by the party that incurred the cost.

Within thirty (30) calendar days of the conclusion of hearing, the arbitrator panel shall render its

decision. Each panel member shall either concur in the panel's decision, or submit a dissent to that decision. The decision of the arbitration panel shall be final and binding.

#### 20.3 Failure to Respond and Extensions of Time

- 20.3.2 All time periods specified in this procedure may be extended by mutual written (including email) consent of the aggrieved employee(s), or Teamsters representative and the designated management representative.
- 20.3.3 "Working Day" is defined as Monday through Friday, excluding holidays.
- 20.3.4 A grievance may be advanced to Step 3 upon the mutual agreement of the parties.

The mediator's role is to attempt to resolve the differences raised in the grievance and shall not be to issue any interpretation or recommended opinion. The parties shall split the costs of the mediator equally, if any.

TO: Board of Directors

FROM: Lisa Middleton, Chairperson of the Board

RE: Election of Officers

## Recommendation

Recommend that the Board of Directors (Board) accept nominations and elect the Chairperson and Vice-Chairperson of the Board for SunLine Transit Agency and SunLine Services Group (SunLine).

### **Background**

In accordance with the Joint Powers Agreement, the Board shall elect, from among its members, a Chairperson and Vice Chairperson to serve for one (1) year terms, said terms expiring at the end of each fiscal year. SunLine's meeting by-laws do not create an automatic advancement from Vice Chairperson to Chairperson. Selection of Chairperson and Vice Chairperson shall be by a majority vote of the quorum in attendance, and a failure to achieve such total of affirmative votes, shall be deemed a selection of the incumbent(s) to remain in office. Each person so selected shall serve until a successor is chosen (at any time) by affirmative votes, provided that at the first regular meeting in July of each year, the office of Chairperson and Vice Chairperson shall automatically be reconsidered by the Board.

### **Financial Impact**
